Education

California Polytechnic
State University
San Luis Obispo, CA
Bachelor of Art, Physics

Languages

Python, TypeScript, C++, HTML,
JavaScript, Lua, Rust, Bash,
VimScript, CSS, SCSS, MATLAB

Skills

Git, AWS, Markdown, CMake,
Makefile, Arduino, soldering, CAD

Software

PostgreSQL, VirtualBox, Docker,
Photoshop, Microsoft Office,
LabVIEW, winget

Operating Systems

Linux: Arch, Ubuntu, Red Hat

Windows: 10, 8, 7

Libraries

Next.js, React, Selenium, Matplotlib,
NumPy, jQuery, Google Test, CV2,
MSS, Tesseract, FuzzyWuzzy,
Prisma, tRPC, Zod, NextAuth,
PyAutoGUI

This [resume](#) was created using
HTML & CSS

Work Experience

BAE Systems: Software Engineer

Fall 2021 - Present

- Integrate and test Linux software on military equipment
- Utilize simulation tools to test software on embedded and virtual environments
- Examine teammates' code to ensure military and product specifications

BEACON: Student Assistant

Summer 2017 - Fall 2019

- Assisted creating an array of radio antennas to detect high energy cosmic neutrinos
- Independently worked on simulating, prototyping, and constructing antennas
- Analyzed hundreds of simulations using Python, Matplotlib, and NumPy
- Communicated with a diverse multidisciplinary team from three universities

Personal Projects

AnimeCalendar: [Documentation & Source Code](#)

Winter 2020 - Summer 2022

- Created a customizable calendar allowing users to pick from currently airing anime
- Provided a quick access to each anime stream like Hulu, YouTube, Crunchyroll, etc.
- Programmed a event handler to record and display user watch history
- Built a responsive website with native TypeScript, SCSS, and HTML
- Deployed Selenium and cURL to web scrape cover art, stream links, air times, etc.

Anical

Summer 2022 - Present

- Building a full stack Next web app, successor to Anime Calendar
- Created a login and authentication system using NextAuth
- Store and manage user info using AWS PostgreSQL database
- Designed an end-to-end type safe full stack with TypeScript, tRPC, Prisma, Zod

GI-Artifact-Levelers: [Documentation & Source Code](#)

Fall 2021

- Designed an algorithm that optimizes upgrading gear in the game Genshin Impact
- Produced a Python script with PyAutoGUI to automate in-game mouse actions
- Employed Tesseract, MSS, CV2 to capture and read onscreen images in real time

GitPrompt: [Documentation & Source Code](#)

Fall 2020 - Summer 2021

- Developed an open source CLI tool that color codes files at various git stages
- Adjusted user Linux prompt displaying latest commit log, total stashes, branch, etc.
- Coded a multithreaded C++ program with object oriented programming and pipes

Relevant Coursework

Data Structures & Fundamentals of Computer Science

Spring 2020

- Implemented various data structures using object oriented programming
- Performed unit testing for code using the PyUnit framework and Coverage.py
- Aided dozens of peers by debugging projects and answering questions

Advanced Instrumentation in Experimental Physics

Spring 2020

- Constructed basic collision-avoiding robot using motors, sonar, and LabVIEW
- Programmed an Arduino to measure temperature change using humidity sensors
- Automate categorizing filter type from input signals using LabVIEW

Physics on the Computer

Spring 2018

- Solved complex physics problems by coding simulations and data manipulation
- Utilized numerical methods like Monte-Carlo, interpolation, optimization, etc.

Leadership Experience

Cal Poly Chess Club: Event Coordinator

Fall 2017 - Spring 2018

- Collaborated with cabinet to plan and organize public events

Ballet Folklórico de Cal Poly: Public Relations

Fall 2016 - Spring 2017

- Maintained the public image and online presence of the club
